

How to bookmarks a web page with JavaScript

Follow Simple 3 Steps.

1. Add Following code where you want to show the **Bookmark Button**.

```
<a href="https://www.blogger.com/blogger.g?blogID=5911253879674558037#" id="bookmarkmarkme"
```

2. Include jQuery File

```
<script src="//code.jquery.com/jquery-migrate-1.2.1.min.js"></script>
```

3. Add Following **JavaScript code** at end of page.

```
$(document).ready(function() {
    $("#bookmarkmarkme").click(function() {
        /* Mozilla Firefox Bookmark */
        if ('sidebar' in window && 'addPanel' in window.sidebar) {
            window.sidebar.addPanel(location.href,document.title,"");
        } else if( /*@cc_on!@*/false) { // IE Favorite
            window.external.AddFavorite(location.href,document.title);
        } else { // webkit - safari/chrome
            alert('Press ' +
                (navigator.userAgent.toLowerCase().indexOf('mac') != - 1 ? 'Command/Cmd' : 'CTRL') + ' ' +
                'D to bookmark this page.');
```
